

Bring Real-Time Shop Floor Data into Every Quality Decision

Automatically Access Shop Floor Data Directly from Inspection Equipment for Quality Analysis

Streamline Quality Data. Eliminate Manual Work. Gain Real-Time Visibility.

In high-stakes manufacturing, timely access to accurate shop floor data is critical. Prolink—now a Minitab company—**enables automatic data collection from inspection equipment, sensors, and PLCs**, turning raw measurements into real-time insights without manual intervention.

➔ Strategic Value at Every Level

Whether you're managing one facility or scaling globally, Prolink equips you to:

- **Increase Efficiency** with automated data flows & alerts
- **Enhance Quality** by detecting issues before they escalate
- **Accelerate ROI** by eliminating wasteful manual processes
- **Ensure Compliance** with traceable, real-time data

➔ Unify Your Shop Floor and Quality Teams

Prolink's powerful products are now organized into **four solution packages**, each designed to address a specific part of your quality journey:

- 1. COLLECT:** Automatically pull measurement data from CMMs, gages, and PLCs into one reliable system.
- 2. CONTROL:** Automatically pull measurement data from CMMs, gages, and PLCs into one reliable system.
- 3. OPTIMIZE:** Cut reporting time from hours to minutes by sending inspection data straight into Minitab, Excel, or JMP.
- 4. INSIGHT:** Turn shop floor data into real answers with advanced analysis and predictive solutions from the Minitab ecosystem.

The SPC charts update immediately. Reporting is intuitive, and integration with our machines was seamless.
